EMERALD ASH BORER (EAB) ALERT

THE LARGEST EAB INFESTATION IN NY IS IN YOUR AREA!

EAB is an invasive beetle from Asia that kills Ash trees
Infested trees die rapidly and become very hazardous

Small 1/2" Green Metallic Beetle

ULSTER AND GREENE COUNTY ARE UNDER QUARANTINE FOR EAB

Movement of firewood and ALL Ash wood is under regulation
Learn more from the NYSDEC *http://www.dec.ny.gov*

EDUCATE YOURSELF - LEARN MORE AT *http://nyis.info*

KNOW YOUR ASH

Identify the ash trees on your property. Note trees that pose a danger.

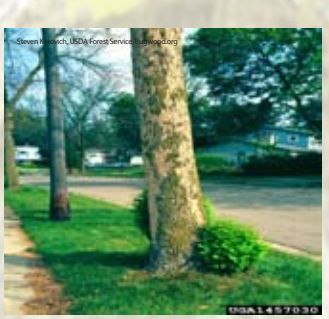
DEVELOP A PLAN

Consider removing and replacing large older trees in hazardous locations
Individual trees can be treated with an systemic insecticide applied by a certified applicator

KNOW THE SIGNS OF EAB

Monitor your trees! Report to Cornell Cooperative Extension or the NYSDEC at (866) 640-0652

"S" Shaped Galleries Under Bark



Bark Flaking Off

Trunk Sprouts

Thin/Dead Branches

Excessive Woodpecker damage

GET INVOLVED

Join the Greene EAB Task Force and help to minimize the impacts of EAB on your community
Contact Richard Burstell at Cornell Cooperative Extension (518) 622-9820 ext. 25
Encourage your community to do a street tree inventory and develop a preparedness plan
Inform you neighbors and help them ID their ash trees
