Village of Catskill Lead Service Line (LSL) Inventory Survey

The Village of Catskill is preparing its Lead Service Line (LSL) Inventory to comply with New York State Department of Health's October 16, 2024 deadline. To do this, we are asking for your help. We have compiled an initial inventory from historical water system data, and we are asking you to help us fill in the blanks. The LSL inventory will serve as a basis to apply to funding agencies in NYS for grants to possibly help replace water services lines that contain lead. Your information will not be shared or sold to any third-party groups, it is strictly for the purpose of creating the most comprehensive list for funding applications and to better understand the Village's water needs.

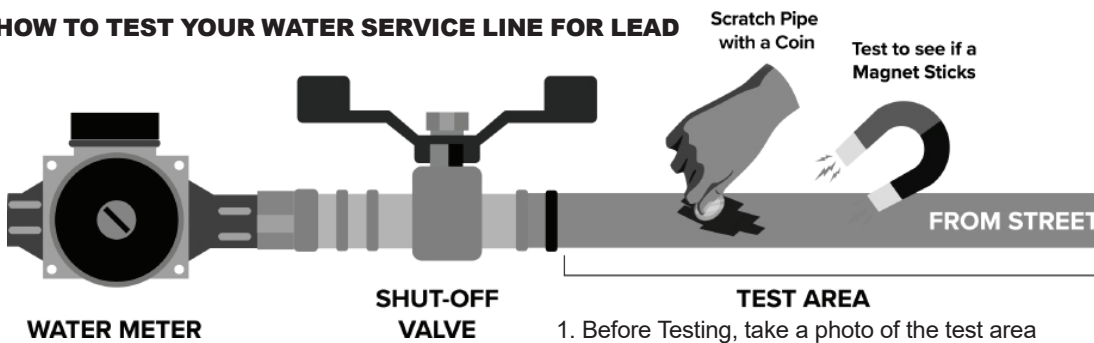

You have the option of filling the survey out online at: <https://bit.ly/catskillLSL> or Scan the **QR Code** to go directly to the survey online.

The survey will require you to visit your basement. If you are mobility challenged and need assistance, please contact the Village at 518-934-3830

HOW TO TEST YOUR WATER SERVICE LINE FOR LEAD

1. Before Testing, take a photo of the test area
2. Take a picture of the scratches you make on the pipe
